ABSTRACT

The 1990 report on student charges at public colleges and universities describes the costs of attending about 90 percent of the national publicly assisted, four-year institutions. The report uses data compiled by the American Association of State Colleges and Universities (AASCU) and the National Association of State Universities and Land-Grand Colleges (NASULGC). The report covers issues including 2-year comparisons of average undergraduate charges; average room and board costs; and average charges for graduate students and students in first professional schools of law, medicine, dentistry, and veterinary medicine. It also examines current theories among educators and economists about the cause of rising tuition and predications for future trends. For the fourth consecutive year, the most often-cited reason for increases in student charges was faculty salary increases with the following other factors cited in descending order: equipment and facilities replacement and repair, legislative action affecting the relationship between tuition and cost; and decreasing appropriations. Review of recent analysis of rising costs notes attempts to redirect attentions to consideration of enrollment trends and expenditures and economic trends as important factors. Extensive appendices present data tables including cost information for specific colleges and universities. (JB)

PREFACE

The 1989-1990 report on student charges at public colleges and universities is a joint project of the American Association of State Colleges and Universities (AASCU) and the National Association of State Universities and Land-Grant Colleges (NASULGC). These organizations represent 90 percent of the nation's publicly supported, four-year institutions of higher education.

The 375 AASCU-member institutions represented in this report enroll 2.8 million students. Sixty-two percent of AASCU institutions are comprehensive universities; 29 percent are general baccalaureate institutions with primary emphasis on undergraduate education; and 5 percent are doctoral-level institutions. AASCU members grant more than 322,000 bachelor's degrees annually--approximately 33 percent of the nation's total, about 26 percent of the master's degrees awarded each year, and 6 percent of the doctoral degrees.

The 149 members of NASULGC--53 principal state universities, 72 land-grant campuses, and 24 multicampus system administration offices--enroll more than 2.6 million students; invest more than $33 billion in teaching, research, and public-service programs annually, and award about 468,000 degrees yearly including about 60 percent of all U.S. doctorates. NASULGC-member campuses claim about 14 million graduates.

This report details this year's trends in student charges for AASCU and NASULGC member campuses. Appendices include cost information for specific colleges and universities. The report covers several important issues, including two-year comparisons of average undergraduate charges; average room and board costs; and average charges for graduate students and students in first professional schools of law, medicine, dentistry, and veterinary medicine. This report also examines current theories among educators and economists about the causes of rising tuition and predictions for future trends.

NARRATIVE

The slowdown in the rate of increase of student charges from one year to the next may have halted, according to the results of the 1989 survey of student charges at public colleges and universities. Reductions in state appropriations, rising faculty salaries that meet inflation rates, and the upgrading of facilities and equipment are the forces behind the increases, according to responses from the state colleges and universities participating in the annual survey.

While the average tuition for in-state (resident) students increased 7.67 percent (only .67 percent more than last year's reported increase), the rate of increase for out-of-state (nonresident) students increased markedly, by 10.43 percent. The last reported rate of increase (1987-1988) for nonresidents at all public colleges and universities was 7.5 percent.

As the accompanying tables and graphs show, tuition and fees and room and board costs for undergraduate and graduate education at public colleges remain low. Still, recognizing some student groups may have difficulty financing their educational experiences, colleges and universities offer a number of incentives and alternatives that reduce the amount paid by participants, both resident and nonresident students.

OVERALL AVERAGES FOR AASCU, NASULGC, AND NONAFFILIATED COLLEGES AND UNIVERSITIES

In the Fall 1989 survey of student charges at public four-year institutions, 497 colleges and universities responded to the survey questionnaire. These colleges and universities included 350 AASCU members, 116 NASULGC members, and 31 nonaffiliated public four-year colleges and universities. Because the response rate from the nonaffiliated institutions was low for this survey and since their institutional characteristics varied substantially, these institutions are not reported in a separate group but included in the "overall" category for average and percent change calculations. Please note that the 1988 average reported for a particular institution in the 1989 report may differ slightly from that reported in the 1988 report. The reporting institutions are offered the opportunity to revise or correct their figures of the previous year. In almost all cases, however, the base year numbers are within a few dollars of those reported previously.

Undergraduate Tuition and Fees. Based on a response of 497 public colleges and universities, the 1989 overall average tuition for in-state students was $1656.94...a percent increase of 7.67 over the revised 1988 average of $1,538.95 for a dollar increase of $117.99.

The tuition charges for out-of-state students rose steeply in 1989. Of the 495 public colleges and universities responding to our survey, the average tuition/fee charge in 1989 was $4,439.33, a percent increase of 10.43 over the 1988 revised average charge of $4,020.01 and a dollar increase of $419.32. (See Table 1/Graph 1)

Room and Board. In a two-year comparison of undergraduate room and board charges, of the 403 public colleges and universities responding to this portion of our survey, the average 1989 charge was $2,873.38...a 5.37 percent increase over the revised 1988 average of $2,726.94 for a dollar increase of $146.44. (See Table 2/Graph 2)

Graduate Tuition and Fee Charges. Of the 446 public colleges and universities responding, the in-state tuition and fee charges for graduate students rose by 8.57 percent. The average 1989 charge was $1,900.82...a dollar increase of $150.11 over the revised 1988 average charge of $1,750.71.

For out-of-state graduate students, the average tuition/fee charge increased dramatically in 1989. Of the 445 respondents, the 1989 tuition/fee charge rose 11.55 percent to an average of $4,562.83 over the revised 1988 average of $4,090.52...a dollar increase of $472.31. (See Table 3/Graph 3)

AASCU CAMPUSES

For Undergraduate Students. Based on the responses from 350 respondents of AASCU-member institutions, the average in-state tuition/fee charge for Fall 1989 was $1,573.19, up from the 1988 revised average tuition/fee charge of $1,460.87...a dollar increase of $112.32 and a percent increase of 7.69. For nonresident students, of the 349 member institutions who responded, there was an increase of 10.43 percent from 1988 to 1989. The average revised tuition for 1988 was $3,737.22...a dollar increase of $389.87 for a 1989 average of $4,127.09. (See Table 1/Graph 1)

Room and Board. Of the 284 member institutions responding to this year's survey, the average combined room and board charge for 1989 was $2,752.04, up from a revised 1988 charge of $2,613.50 for an average dollar increase of $138.54 and a percentage increase of 5.30. (See Table 2/Graph 2)

For Graduate Students. Of the 303 AASCU institutions responding to our survey, the average in-state graduate tuition/fee charge for 1989 was $1,752.07, a percentage increase of 8.96 over the revised 1988 average of $1,608.02, and a dollar increase of $144.05. For out-of-state graduate students, there was a significant increase in tuition/fee charges. The 1989 average was $4,141.18, a 12.04 percent increase over the revised 1988 average of $3,696.19...an average dollar increase of $444.99. (See Table 3/Graph 3)

NASULGC CAMPUSES

For Undergraduate Students. Of the 116 NASULGC- member institutions responding to our survey, the average 1989 charge for in-state tuition and fees was $1,873.08, a 7.60 percent increase over the 1988 revised average of $1,740.70. This is a dollar increase of $132.38 in a two-year comparison. For out-of-state students, 115 NASULGC-member institutions responded. The 1989 average for these schools was $5,162.77...9.75 percent increase over the 1988 revised average of $4,704.14. (See Table 1/Graph 1)

Room and Board. For a two-year comparison of the 109 NASULGC institutions responding to this question, the 1989 average was $3,074.21...a 5.41 percent increase over the revised 1988 average of $2,916.38 and an average dollar increase of $157.83. (See Table 2/Graph 2)

For Graduate Students. In a two-year comparison of in-state graduate tuition and fee charges, 114 NASULGC-member institutions responded. The average 1989 in-state tuition/fee charge was $2,161.24 compared with $1,998.47 in 1988...a percentage increase of 8.14 and an average dollar increase of $162.77. For nonresident graduate students, the increase in tuition and fees was even more striking. Of the 113 institutions responding, the average 1989 tuition/fee charge was $5,299.15, a 10.42 percent increase and a dollar increase of $499.96 over the 1988 average of $4,799.19. (See Table 3/Graph 3)

FIRST PROFESSIONAL CHARGES: All Membership Categories

LAW Sixty-nine institutions responded to our survey question about in-state tuition/fees. The 1989 average in-state Law tuition was $2,841.55, an average dollar increase of $288.04 and a percent increase of 11.28 over the revised 1988 average of $2,553.51. For nonresident law charges, 68 institutions responded to our survey question. The 1989 tuition increased by an average of $670.72 from $5,983.91 in 1988 to $6,654.63 in 1989...a percent increase of 11.21. (See Table 4/Graph 4)

MEDICINE Seventy-four institutions responded to our survey question about in-state medical tuition and fees. The increase for in-state medical school tuition and fees appears to have slowed this year, showing a modest rise of only 7.94 percent. The average reported 1988 charge was $5,219.91...a dollar increase of $414 for a 1989 average of $5,634.57. For out-of-state medical students, 72 institutions responded showing a more typical increase over last year. The 1989 average was $12,805.22, a 10.10 percent increase over the revised 1988 average of $11,630.07, a dollar increase of $1,175.15. (See Table 4/Graph 4)

VETERINARY MEDICINE Twenty-two institutions responded to our

survey question about tuition/fees for in-state students in veterinary programs. The 1989 average was $4,375.95. This was a 10.20 percent increase over the revised 1988 average of $3,970.86 and an average dollar increase of $405.09. Of the 21 institutions reporting figures for out-of-state charges in veterinary programs, a 10.88 percent increase over 1988 figures was noted. The 1989 average was $11,182.19...a dollar increase of $1,097.00 over the revised 1988 average charge of $10,085.19. (See Table 4/Graph 4)

DENTISTRY Thirty-two institutions reported figures for dental tuition/fees for both in-state and out-of-state programs. For in-state charges, a relatively modest increase of 9.02 percent was reported this year with the 1989 average of $5,496.00...an increase of only $454.59 over the revised 1988 average of $5,041.41. For out-of-state dental students, the trend toward substantial increases continued for most programs reported by institutions around the country. A 12.08 percent increase occurred with the 1989 average reported at $12,546.50...a dollar increase of $1,352.03 over the revised 1988 average tuition of $11,194.47. (See Table 4/Graph 4)

FACTORS AFFECTING STUDENT CHARGES

For the fourth consecutive year, the most often-cited reason for increases in student charges was faculty salary increases. Fifty-one percent of the respondents cited faculty salary increases; 42 percent of the respondents cited equipment and facilities replacement and repair; 38 percent cited legislative action affecting the relationship between tuition and cost; and 35 percent cited decreasing appropriations. For example, all branches of the University of California cited inflation and workload increases. Colorado State University cited increased student fees. The Massachusetts budget crisis stimulated increased tuition charges. All reporting universities in Maine cited salary and wage increases and the rising cost of goods and services. In addition, Maine Maritime Academy cited rising food and housing costs. Reporting universities in Oklahoma cited regents' initiatives.

Changes in Fee Structure. One hundred and one institutions, or 23 percent of all respondents, reported a recent change in their student fee structures. The changes reported by institutions consisted of dollar increases or the implementation of new or supplementary fees, for example to cover yearly advisement and record maintenance for nonresident students.

Typical Categories of Mandated Fees. Three hundred ninety-one, or 91 percent, of the respondents provided some examples of fees assessed most students. The most commonly cited categories included student activity fees, student service fees, building fees (student facility fees), athletic fees, student insurance fees, student union operations fees, and fees to cover textbook rental,

performing arts, and student publications.

Alternatives to Reduce Tuition Costs. Since the four-year public colleges were last surveyed on this question, (1986 annual survey) the proportion of institutions offering reductions to typical student charges has remained about the same. One hundred twenty institutions, or 27 percent, in 39 states responded that they engage in tuition reciprocity agreements with neighboring states.

Tuition Reduction for Specific Student Groups. Of the 430 institutions responding, 127 or 29 percent reported the existence of tuition reduction policies for specific student groups. For example, the University of Iowa cited graduate teaching and research assistants. Idaho State University considered senior citizens to be in this category. Eastern Kentucky University, Western Kentucky University, and Murray State University (KY) cited tuition incentive arrangements with certain counties in Tennessee and Indiana.

Free Tuition. Ninety-four institutions (22 percent) responded that particular student groups were eligible for free tuition. Seniors (100 percent free for adults age sixty and over), is the group most likely to be identified by public colleges and universities as beneficiaries of free tuition. "Young scholars," veterans, dependents of veterans and police officers killed in the line of duty, disabled persons, some financial aid recipients, minority youths, and valedictorians were included among those receiving free tuition. Among those offering free tuition to senior citizens: North Carolina Central University, the University of Central Arkansas, Kennesaw College (GA), the University of South Florida, and Southeast Missouri State University. South Dakota State University offers free tuition to the visually handicapped. Montana State University offers free tuition to honorably discharged veterans.

Tuition Waivers and Fee Reductions for Employees, Faculty, and Dependents. Of the 432 institutions surveyed, 314 (73 percent) grant tuition waivers and fee reductions to institutional employees, faculty, and their dependents, though many institutions put a limit on credit hours taken at the reduced rate, require a copayment equal to 50 or 75 percent for dependents, or limit the tuition waiver to one course per semester. For example, Jacksonville State University (AL) requires a 50 percent copayment of employees and dependents. Colorado State University permits staff and faculty to take up to six credit hours free per year while Ball State University waives tuition but requires payment of fees for courses taken by faculty, employees, and dependents.

GRADUATE EDUCATION: Changes Over a Three-Year Period

AASCU There were 252 AASCU-member institutions responding to the 1989 survey questions about changes in graduate tuition and fees.

Eighty-five percent (215) stated that graduate tuition and fees have increased at approximately the same rate as that for undergraduate tuition and fees over a three-year period. Thirteen AASCU respondents (5 percent) reported that graduate tuition and fees have been more stable than those of undergraduates over the three-year period. Twenty-one institutions (8.3 percent) reported that graduate tuition and fees have increased at rates substantially higher than undergraduate tuition and fees.

Two hundred thirty-five AASCU member institutions responded to our survey question about the estimated contribution made by graduate tuition and fees to the cost of graduate education. Ninety-six institutions (41 percent) estimated contributions at up to 25 percent. Seventy-two institutions (31 percent) estimated costs at 25-35 percent. Forty-six (20 percent) AASCU members estimated a cost contribution of 35-50 percent. Five institutions estimated graduate tuition and fees contributed 50-75 percent of the cost of the program. Eight institutions estimated costs at 75-100 percent.

NASULGC Of the 121 NASULGC institutions responding, 112 reported on the rate of change in graduate tuition and fees in the last three years. Ninety-five NASULGC institutions (85 percent) reported that graduate tuition and fees have increased at approximately the same rate as the undergraduate tuition and fees. Seven NASULGC institutions reported that their graduate tuition and fees have been more stable than their undergraduate tuition and fees. Seven institutions reported that their graduate tuition and fees have increased at substantially higher rates than undergraduate tuition and fees.

Of the 99 institutions responding concerning tuition and cost, an analysis of the estimated contribution made by graduate tuition and fees to the cost of graduate education resulted in the following breakdown: 45 institutions (45 percent) reported a contribution of up to 25 percent; 25 institutions reported a contribution of 25-35 percent; 13 institutions reported a contribution of 35-50 percent; two institutions reported a contribution of 50-75 percent; two institutions reported a contribution of 75-100 percent.

RECENT PERSPECTIVES ON RISING STUDENT COSTS

For most of this decade, the annual reports on public college and university student charges have examined institutional, societal, and governmental factors affecting rates of increase. Each year independent reports continue to be published searching for explanations and the annual student charges report references these for our readers.

Two thorough reviews of factors affecting student charges have been completed independently in 1990 by Carol Frances and Arthur Hauptman. Both researchers attempt to redirect attentions away

from the cost/inflation question, that is, will tuition and fees continue to rise several percentage points above inflation, and is this just? Hauptman offers an enrollment perspective as a constructive way to analyze and forecast changes. Frances examines expenditures and economic trends that are beyond the control of higher education institutions.

Education experts Frances and Hauptman agree on some basic factors affecting college charges in the 1980s. In his in-depth study "The College Tuition Spiral: An Examination of Why Charges Are Increasing," (ACE/Macmillan, 1990) Hauptman describes six of these factors to which writers and researchers attribute the rapid increase in tuition and costs of college attendance: (1) Higher tuitions reflect the higher prices that universities and colleges must pay for goods and services; (2) Universities and colleges are using higher tuition charges to pay for expanded or improved services; (3) College charges have increased because the share of costs covered by nontuition revenues such as state and federal funds and endowment income has decreased; (4) Increased availability of student aid has led colleges to raise their student charges; (5) Competition for qualified students and quality faculty has forced colleges and universities to increase their charges.

Hauptman departs from the often cited reasons with a different thesis. He focuses on enrollment trends as a major influence on rising college costs and in his sixth factor for rising tuition, he points to: the decline in the size of the traditional college-age population (18-24 year-olds) which places significant financial pressures on many colleges and universities. Hauptman concludes that since the beginning of the 1980s, this age group has declined by approximately 15 percent, and will continue to decline by another 10 percent until the trend bottoms out in the mid 1990s. However, enrollments have remained somewhat stable as a result of: (1) a higher overall percentage of graduating high school seniors who pursue at least one year of postsecondary study; and (2) nearly 40 percent of students currently enrolled in postsecondary study are 25 years of age or older, up from 30 percent in 1980. Hauptman states that if this trend continues, by the end of the century, over half of all college students will be 25 and older. Hauptman suggests that while higher education has avoided the disaster of falling enrollments, the shrinkage in the size of the traditional college-age population has contributed to rising college costs in three ways: (1) the inability of colleges to capture increasing economies of scale; (2) the increased costs of recruitment; and (3) the economic impact of fewer college graduates of traditional age entering the labor market.

To the question: "Will tuition increases in the future continue to outpace inflation by a larger margin, or can we expect to see a return to the historical pattern in which college charges tended to exceed inflation by only a percentage point or two a year?",

Hauptman responds that if trends in the size of the traditional college-age population are in fact a major determinant of the cost of educating a college student and of what colleges charge for tuition, then we should not expect a return to the more traditional relationship between college prices and inflation until the traditional college-age group begins to increase again in the mid-1990s.

Economic climate as an explanation continues to receive popular support in the press. Education writer Karen Grassmuck points a finger at an unfavorable economic climate which she predicts will continue into the 1990s. In an article published in The Chronicle of Higher Education (January 31, 1990), she states that colleges and universities are beginning to borrow cost-cutting strategies from the government and from private industry. Grassmuck reviews the following factors contributing to the continuing upward spiral of tuition costs: spiraling prices for laboratory equipment and facilities, subscriptions to scholarly journals, a forthcoming faculty shortage promising to drive starting salaries upward, possibly sparking bidding wars among universities, campus buildings in need of some $70 billion in repairs and replacement (according to the National Association of College and University Business Officers), new state and federal regulations pushing up the cost of compliance with environmental laws, escalating legal fees, and finally, the soaring cost of tuition and the public's inability or unwillingness to pay which will increase higher education's concern over "market sensitivity" --- the point at which enrollments begin to decline.

According to Grassmuck, some universities have started million-dollar fund-raising campaigns. The business strategies that colleges and universities are considering include: (1) setting institutional goals and formulating long-term plans; (2) pursuing more aggressive investment strategies in an attempt to get a higher rate of return on endowment funds; (3) marketing and packaging college programs to attract specific types of students such as minorities, adult learners, and workers who need retraining; and, (4) reducing the number of programs offered by institutions and focusing on excellence in certain academic specialties.

Education writer Jean Evangelauf (The Chronicle of Higher Education, February 14, 1990) predicts that the cost of attending college is virtually certain to continue its upward spiral next fall. Early announcements by many universities and colleges show that they are planning to increase tuition again by 5-11 percent, and experts predict that 1990-91 will be the 10th consecutive year in which average tuition rates rise faster than the rate of inflation. In 1989 inflation as measured by the Consumer Price Index was 4.6 percent. The federal government estimates that consumer prices will rise 4.1 percent this year and 4 percent in 1991.

Evangelauf concludes that, in the coming decade, tuition increases at public colleges will vary considerably across the country reflecting the health of the economies of the individual states. Those with tight budgets will face pressure to raise costs while those with increases in appropriations for higher education will continue to hold tuition steady.

In the opinion of economist Carol Frances (What Factors Affect College Tuition? A Guide to the Facts and Issues, AASCU 1990) a review of the tuition and fee changes in the 1980s indicates the rate of increase in tuition has slowed, but not as much as the underlying costs. Tuitions have continued to increase, in part because of shortfalls in other sources of revenue and the consequent shift of a larger share of costs to the students. Frances predicts that there will be considerably greater external economic pressures pushing tuition higher in the 1990s than there are restraints holding them down. Consequently, in establishing tuition levels, the challenge will be to balance the internal educational imperatives and aspirations against the external economic trends. Most projections of tuition levels into the future, concludes Frances, are based on economic trends that institutions of higher education cannot control.

METHODOLOGY

The fall 1989 AASCU/NASULGC student charges survey forms were mailed in November 1989 to approximately 577 public four-year institutions of higher education in the United States and its territories. As in previous years, the 1989 survey forms were sent to universities and colleges with the 1988 figures printed on the form. Participants were asked to review and correct last year's information in addition to providing the 1989 information. These revisions result in our use of the term "revised" 1988 averages or "revised" 1988 student charges.

The survey consisted of two pages. The first included the annual charges for tuition, mandatory fees, and room and board paid by resident and nonresident undergraduate, graduate, and first-professional students in law, medicine, dentistry, and veterinary medicine programs. For calculating these charges it was suggested that 30 credit hours be used for undergraduate students and 18 credits for graduate students. If institutions assessed different charges for upper and lower levels, respondents were asked to provide the average of typical charges for the two levels. The survey's second page concerned factors affecting current student charges and student charges for graduate education.

Institutions adhere to particular conventions in reporting student charges information. Some respondents report annual student charges for a typical full-time student based on the number of credit hours necessary to graduate in four years. Others use the "typical" load of 12-15 credit hours per semester. Graduate

student charges are normally assessed based on nine credit hours per semester.

Institutionally reported charges included in this study may be different from the actual charges paid by students. Actual annual costs are affected by student choice of room and board options offered by colleges and universities, different course-load alternatives, and tuition reduction options. Average student charges adjusted by enrollments can be obtained from other organizations such as The College Board or the National Center for Education Statistics (NCES).

As a rule, the annual AASCU/NASULGC reports provide institutional data and averages for survey participants reporting in two consecutive years. Two institutions did not report graduate data for 1988, however, they are included in the appendices of this 1989 report. All institutions involved in this study are state assisted, and student charges are established and regulated by system and institutional governing boards. A degree of consistency throughout the state can be expected with regard to student charges. Differences are closely related to the variety of institutional missions within each state.

Some idiosyncrasies are important to note since they affect the way institutions are listed in the appendices. There are approximately 19 institutions which are members of both AASCU and NASULGC. Included among this category are many of the campuses of the CUNY system, which is itself a member of the NASULGC association. For the sake of year-to-year reporting consistency, these institutions are listed separately in the NASULGC appendices.

The nonaffiliated institutions are reported separately in Appendix E. In Appendix F, the nonaffiliated institutions are starred and integrated with all institutions offering first professional programs.

In public colleges and universities in Puerto Rico, nonresident students who are U.S. citizens pay an amount equal to the rate for nonresidents at a state university in their home states. Therefore, no nonresident charges are reported for these institutions.

Dakota State University changed the rate of nonresident tuition in the spring semester of 1989 such that nonresidents now pay resident tuition rates. This explains the apparent decrease in tuition from one year to the next in the institutional listings.

TABLE 1

AVERAGE UNDERGRADUATE TUITION/FEES CHARGES
FALL 1988 AND FALL 1989 COMPARISON
